OBJECTIVES

JF China Region Fund, Inc. (the 'Fund') seeks to achieve long-term capital appreciation through investments primarily in equity securities of companies with substantial assets in, or revenues derived from, the People's Republic of China ('China'), Hong Kong, Taiwan and Macau — collectively, the 'China Region'.

The Fund provides investors with an opportunity to participate in the growing economies of the China Region where the economies of China, Hong Kong, Taiwan and Macau have become increasingly linked over recent years. Hong Kong enterprises have made substantial investments in China, particularly where labor and land prices are lower than in Hong Kong. Similarly, many Chinese companies have Hong Kong based subsidiaries with securities listed on the Hong Kong Stock Exchange. A-Shares, which are listed in China, are available for acquisition by institutional investors including the Fund (indirectly). Many Taiwan enterprises also have operations in China.

The Fund invests to take advantage of the many opportunities that result from this linkage among the markets of the China Region.

MANAGEMENT

JF International Management Inc. ('JFIMI') is the investment management company appointed to advise and manage the Fund's portfolio (the 'Investment Advisor'). JFIMI is part of JPMorgan Chase & Co. ('JPMC'), one of the world's premier financial services institutions. In asset management, JPMC operates globally under the name of J.P. Morgan Asset Management ('JPMAM'), although in Asia it also uses the sub-brand JF Asset Management. Funds under management for the global asset management business of JPMAM were US\$1.3 trillion as of June 30, 2011.

The Fund's lead portfolio manager is Emerson Yip, Senior Portfolio Manager within JPMAM's Greater China investment team in Hong Kong.

FORWARD-LOOKING STATEMENTS

This report contains certain forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934. Forward-looking statements include statements regarding the goals, beliefs, plans or current expectations of the Fund and JFIMI and their respective representatives, taking into account the information currently available to them. Forward-looking statements include all statements that do not relate solely to current or historical fact. For example, forward-looking statements include the use of words such as “anticipate,” “estimate,” “intend,” “expect,” “believe,” “plan,” “may,” “should,” “would,” or other words that convey uncertainty of future events or outcomes. Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of the Fund to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Factors that could materially and negatively affect the results, performance or achievements of the Fund include changes in economic, political, legal and regulatory conditions in the China Region and elsewhere, changes in interest and exchange rates and related policies and other risks. When evaluating the information included in this report, you are cautioned not to place undue reliance on these forward-looking statements, which reflect the judgment of the Fund, JFIMI or its respective representatives only as of the date hereof. The Fund, JFIMI and their respective representatives undertake no obligation to publicly revise or update these forward-looking statements to reflect events and circumstances that arise after the date hereof.

CHAIRMAN'S STATEMENT

JUNE 30, 2011

Dear fellow Stockholder,

Performance

With the exception of the MSCI China Index, the Greater China markets fell marginally in the six months to June 30, 2011, against a backdrop of macro headwinds including the political unrest in the Middle East, the devastating earthquake in Japan and the resurfacing of sovereign debt pressures in Europe. At a domestic level, inflationary concerns in China continued to persist alongside monetary tightening measures. On a more positive note, all three of the Greater China markets demonstrated robust domestic consumption growth throughout the period.

During the period, the Fund's net asset value declined 1.3%, underperforming the benchmark, the MSCI Golden Dragon Index (total), which fell by 0.6%. The Fund's share price fell 3.3%, reflecting a widening of the discount from 9.3% at December 30, 2010 to 11.2% at June 30, 2011. The Fund's underperformance was largely attributable to stock selection effects in China and Hong Kong, whilst selections in Taiwan contributed positively to performance.

Leverage

At the Annual Stockholders' Meeting held on May 12, 2011, stockholders voted in favour of an addition to the Fund's Investment Policies to permit borrowed monies up to 20% of net assets (not including the amount borrowed) for investment purposes. Your Board is currently in the process of

agreeing a credit facility for the Fund and expects to announce details of the facility in due course. Whilst discretion is with the Investment Advisor, your Board intends to monitor closely how the Fund's leverage will be utilized and the investment results it delivers.

China A-Shares

As previously stated, your Board is seeking to increase its China A-Share exposure by approximately \$20m, although the timing of this remains uncertain and is subject to market conditions and necessary regulatory approval. The Fund's portfolio currently has an indirect 3.8% weighting in China A-Shares through the JF China Pioneer A Share Fund.

Outlook

Volatility will remain a key theme in the near to mid term. Despite macro and micro pressures, your Investment Advisor believes that valuations remain attractive in the Greater China region and domestic economic growth is expected to remain strong. Your Board remains confident in the long term growth prospects of the Greater China region and in the Investment Advisor's ability to steer the Fund through these uncertain times.

Respectfully submitted

The Rt. Hon. The Earl of Cromer
Chairman

August 29, 2011

INVESTMENT ADVISOR'S REPORT

During the first half of 2011, the Fund achieved a total return on net assets of -1.3%, underperforming the benchmark return of -0.6% by 0.7%. The Fund's underperformance was primarily attributable to stock selection in China and Hong Kong. The largest positive contributor to performance was stock selection in Taiwan, whilst the effects of country allocation were marginally negative.

China

Market Performance

During the first quarter of 2011, Chinese equities outperformed both Hong Kong and Taiwan in a quarter of volatile trading, with both the MSCI China Index and domestic A-Shares (CSI 300) edging upward (about 3% quarter on quarter). The nuclear concerns in Japan and the continuing uncertainty and conflict in the Middle East and North Africa were largely shrugged off, although investors showed a preference for developed markets where inflation was thought to be less of a threat to growth.

Chinese equities corrected in a second quarter of volatile trading while offshore-listed Chinese equities (MSCI China) and domestic A-Shares (CSI 300) posted a decline of 3.5% quarter on quarter and 5.5% quarter on quarter, respectively. A plethora of concerns dominated the headlines – the extent of the economic slowdown, the size of the local government debt problem and the continuous rise in inflation. The last month of the quarter weighed on Chinese equities as rumours of accounting irregularities and allegations of fraud in overseas-listed Chinese companies (particularly in North America) emerged. China's recent macro data suggests a soft landing, with the government's tightening measures being felt.

Market Outlook

While optimistic growth forecasts for the developed world need to be revised downwards due to the

ongoing indebtedness of the public sector, we consider the probability of either a recession or financial crisis to be low. Despite the fact that fighting inflation remains China's short-term priority, Chinese equities could remain volatile amid added uncertainty of external environments and policy noises. However, we think China is most likely at the later stage of its tightening cycle. Equity markets should re-focus on growth prospects when consumer price index ('CPI') pressures alleviate in the third quarter. As a result, we believe we may have seen the worst in terms of economic and stock market performance and are beginning to increase positions in cyclical China.

Hong Kong

Market Performance

Hong Kong equities underperformed the Chinese and regional markets in the first quarter of 2011. Part of the underperformance was driven by the continuing trend of fund flows from emerging to developed markets. Government measures announced in 2010 had little impact on rising property price trends, with prices up over 10% since November 2010. The government also bowed to public pressure by giving out HKD 6,000 (USD 774) to every citizen in cash, even as inflationary concerns remained. Corporate earnings results were generally strong, especially for those companies geared towards the domestic and Chinese economies.

Hong Kong equities were on a downward trend for the second quarter of 2011, weighed down by global and China concerns. On the global front, concerns over the weakening economic recovery and the European fiscal debt crisis predominated. In China, the concern was centered over inflationary pressures leading to an economic hard landing. Liquidity in Hong Kong continued to tighten as we saw continued rapid growth in conversion to off-shore renminbi deposits, which accounted for 9% of total system deposits. The government introduced further

INVESTMENT ADVISOR'S REPORT (continued)

property measures including lowering borrowing amounts for mid-priced properties. Inflation continued to accelerate with headline inflation reaching 5.2% in May, the highest level in three years.

Outlook

The underlying global macro and China issues continue to weigh on the Hong Kong market. However, we believe that inflationary pressure in China should abate during the second half of the year, allowing the policymakers to shift to a neutral or perhaps even loosening stance, which is the key to spurring a sustainable stock market rally. The residential property market now faces the dual headwind of government measures, including potential further supply additions, coupled with rising mortgage rates. However, the commercial market remains robust so long as office and retail growth can be maintained. Despite rising mortgage rates, Hong Kong banks continue to face difficulties in expanding their net interest margins given rising funding costs and the duration of their loan book which delays the pace of re-pricing. The portfolio is currently underweight Hong Kong equities.

Taiwan

Market Performance

Driven by strong foreign buying and despite concerns that a rising Taiwan dollar could impact technology margins, the Taiwan market had a good start to the year, but the trend reversed from mid February. Initially, there was optimism on global demand for technology and the positive spill-over effect from the Economic Cooperation Framework Agreement, a free trade agreement with China. However, the strong inflows to Taiwan reversed after the

Chinese New Year as liquidity retreated out of emerging markets and into developed markets. The sharp rise in oil prices on the back of unrest in Middle East and North Africa raised inflationary fears. Technology and auto stocks underperformed in the first quarter of 2011 on concerns over disruption in component supply from Japan post the earthquake. On the other hand, commodity stocks continued to be strong as key beneficiaries from the supply disruption.

In the second quarter of 2011, the Taiwan markets rebounded strongly after supply disruptions, post the Japan earthquake, were resolved faster than expected. However, rising risk from Euroland debt and weak sentiment for technology stocks dragged the index down in June. Non-technology stocks are seen as safer haven especially with increasing numbers of Chinese tourists visiting Taiwan which fuel positive sentiment on consumer and retail sectors.

Taiwan Outlook

While data points on technology demand for the second half of 2011 look soft, a lot of negatives are already discounted as earnings downgrades for the market are well-advanced. Potential rush orders and restocking in technology could be possible as companies are already geared for a slower second half of 2011. The market could also benefit from more cross-Strait events and any move by China to stop tightening over the next few months as inflation peaks, could act as another positive catalyst for Taiwan equities.

SEE ACCOMPANYING NOTES TO FINANCIAL STATEMENTS.

NOTES TO FINANCIAL STATEMENTS AT JUNE 30, 2011 (Unaudited)

1. Organization and Capital

JF China Region Fund, Inc. (the 'Fund') was incorporated in the State of Maryland on May 22, 1992, and is registered as a non-diversified, closed-end management investment company under the Investment Company Act of 1940 ('1940 Act'). The Fund commenced operations on July 16, 1992.

2. Significant Accounting Policies

The following significant accounting policies, which are in conformity with accounting principles generally accepted in the United States of America ('GAAP'), are consistently followed by the Fund in the preparation of its financial statements.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reported period. Actual results could differ from these estimates.

i) Security Valuation — All securities for which market quotations are readily available are valued at the last sales price prior to the time of determination or, if no sales price is available at that time, at the mean between the last current bid and ask prices. Securities that are traded over-the-counter are valued, if bid and ask quotations are available, at the mean between the current bid and ask prices. Certain investments of the Fund may, depending upon market conditions, trade in relatively thin markets and/or in markets that experience significant volatility. As a result of these conditions, the prices used by the Fund to value securities may differ from the value that would be realized if these securities were sold and the differences could be material. All other securities and assets are valued at fair value as determined in good faith by the Board of Directors. It is possible that the estimated values may differ significantly from the values that would have been used had a ready market for the investments existed, and such differences could be material. In valuing the Fund's assets, quotations of foreign securities in a foreign currency are translated to United States ('U.S.') dollar equivalents at the exchange rate in effect on the valuation date. Investments in open ended mutual funds are valued at current day's closing net asset value per share, with the exception of the JF China Pioneer A-Share Fund, which is valued at the current day's closing bid price.

Valuations reflected in this report are as of the report date. As a result, changes in valuation due to market events and/or issuer related events after the report date and prior to issuance of the report are not reflected herein.

The various inputs that are used in determining the fair value of the Fund's investments are summarized into the three broad levels listed below.

- Level 1 — quoted prices in active markets for identical securities
- Level 2 — other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 — significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input both individually and in aggregate that is significant to the fair value measurement. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

NOTES TO FINANCIAL STATEMENTS
AT JUNE 30, 2011 (Unaudited) (continued)

The following table represents each valuation input by sector as presented on the Investment Portfolio:

	Level 1 Quoted prices	Level 2 Other significant observable inputs	Level 3 Significant unobservable inputs	Total
Total Investment in Securities #	<u>\$109,906,708</u>	<u>\$27,267</u>	<u>\$—</u>	<u>\$109,933,975</u>

All portfolio holdings designated as Level 1 and Level 2 are disclosed individually in the Investment Portfolio. Level 2 consists of rights. Please refer to the Investment Portfolio for industry specifics of the portfolio holdings.

There were no transfers between Levels 1 and 2 during the six months ended June 30, 2011.

ii) Foreign Currency Translation – The books and records of the Fund are maintained in U.S. dollars. Foreign currency amounts are translated into U.S. dollars at the mid-market price of such currencies against U.S. dollars as follows:

- investments, other assets, and liabilities at the prevailing rates of exchange on the valuation date;
- investment transactions and investment income at the prevailing rates of exchange on the dates of such transactions.

Although the net assets of the Fund are presented at the foreign exchange rates and market values at the close of the period, the Fund does not isolate that portion of the results of operations arising as a result of changes in the foreign exchange rates from the fluctuations arising from changes in the market prices of the securities held at period-end. Similarly, the Fund does not isolate the effect of changes in foreign exchange rates from the fluctuations arising from changes in the market prices of securities sold during the period. Accordingly, realized and unrealized foreign currency gains (losses) are included in the reported net realized and unrealized gains (losses) on investments.

Unrealized currency gains (losses) resulting from valuing foreign currency denominated assets and liabilities at period-end exchange rates are reflected as a component of accumulated net unrealized gain (loss) on investments, foreign currency holdings, and other assets and liabilities denominated in foreign currencies.

iii) Restricted and Illiquid Securities – Certain securities held by the Fund may be subject to legal or contractual restrictions on resale or are illiquid. Restricted securities generally may be resold in transactions exempt from registration. An illiquid security is a security which cannot be disposed of promptly (within seven days) and in the usual course of business at approximately its fair value and includes repurchase agreements maturing in excess of seven days, time deposits with a withdrawal penalty, non-negotiable instruments and instruments for which no market exists. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at the current valuation may be difficult.

iv) Distribution of Income and Gains – The Fund intends to distribute to stockholders, at least annually, substantially all of its net investment income and expects to distribute annually any net long-term capital gains in excess of net short-term capital losses. An additional distribution may be made to the extent necessary to avoid the payment of a 4% Federal excise tax.

Income and capital gain distributions are determined in accordance with Federal income tax regulations and may differ from those determined in accordance with GAAP.

v) Other – Security transactions are accounted for on trade date. Realized gains and losses on the sale of investment securities are determined on the identified cost basis. Interest income is recognized on the accrual basis. Dividend income and distributions to shareholders are recorded on the ex-dividend date or when a Fund first learns of the dividend.

vi) Foreign Taxes – The Fund may be subject to foreign taxes on income, gains on investments or currency purchases/repatriation, a portion of which may be recoverable. The Fund will accrue such taxes and recoveries as applicable, based upon its current interpretation of tax rules and regulations that exist in the markets in which it invests.

NOTES TO FINANCIAL STATEMENTS AT JUNE 30, 2011 (Unaudited) (continued)

3. Investment Transactions

During the six months ended June 30, 2011, the Fund made purchases of \$35,151,801 and sales of \$35,249,255 of investment securities other than short-term investments. There were no purchases or sales of U.S. Government securities.

4. Related party, Other Service Provider Transactions and Directors

i) JF International Management Inc. (the Investment 'Advisor'), an indirect wholly-owned subsidiary of JPMorgan Chase & Co., provides investment advisory services to the Fund under the terms of an investment advisory agreement. The Advisor is paid a fee, computed weekly and payable monthly, at the annual rate of 1.00% of the Fund's weekly net assets. Investments in funds on which the Advisor or its affiliates charges a management fee are excluded from the calculation. The Investment Advisor has agreed to waive its entitlement to a management fee on any cash held when borrowings are drawn under a borrowing facility.

ii) During the six months ended June 30, 2011, the Fund did not pay any brokerage commissions to JPMorgan Chase Group companies or affiliated brokers/dealers.

iii) **Other Service Providers** – Pursuant to an Administration Agreement, JPMorgan Investor Services, Co. (the "Administrator"), an indirect, wholly-owned subsidiary of JPMorgan Chase & Co., provides certain administration services to the Fund. The Fund pays an annual administration fee of \$87,500 in respect of tax, compliance, financial reporting and regulatory services.

JPMorgan Chase Bank, N.A. ('JPMCB'), an affiliate of the Fund, provides portfolio custody and accounting services for the Fund. The amounts paid directly to JPMCB by the Fund for custody and accounting services are included in Custodian and accounting fees in the Statement of Operations. In consideration of the accounting services, JPMCB receives a fee computed daily and paid monthly at the annual rate of 0.02% of the first \$12.5 billion of the average daily net assets of all funds in the JPMorgan International Fund Complex and 0.0175% of the average daily net assets in excess of \$12.5 billion of all such funds subject to a minimum annual fee of \$35,000. The custodian fees are split between safekeeping and transaction changes and vary by market.

iv) **Directors** – The Fund pays each of its Directors who is not a director, officer or employee of the Advisor, Administrator or any affiliate thereof, an annual fee of \$22,000, the Audit Committee Chairman \$26,000 and the Chairman \$32,000 plus a \$3,000 attendance fee for each Board meeting, Management Engagement Committee meeting and Audit Committee meeting attended. In addition, the Fund reimburses all Directors for travel and out-of-pocket expenses incurred in connection with Board of Directors meetings. Under normal circumstances, in order to minimize expenses, the Board expects to hold two meetings a year by telephone.

5. Capital Share Transactions

On September 9, 2010, the Board of Directors renewed an authority for the Fund to purchase shares of its common stock from Fund stockholders, as described below. When shares trade at a discount to net asset value, any purchase of shares by the Fund has the effect of increasing the net asset value per share of the Fund's remaining shares outstanding. All shares purchased by the Fund are thereafter considered authorized and unissued.

i) **Share Repurchase Program** – The Fund was authorized to repurchase up to 644,764 shares (10% of its then issued and outstanding shares) in the open market through September 15, 2011. Repurchases can be made only when the Fund's shares are trading at less than net asset value and at such times and amounts as it is believed to be in the best interest of the Fund's stockholders.

During the six months ended June 30, 2011 and the year ended December 31, 2010, the Fund did not repurchase any shares under the share repurchase program.

NOTES TO FINANCIAL STATEMENTS
AT JUNE 30, 2011 (Unaudited) (continued)

6. Risks and Uncertainties

i) **China Region** – Investing in securities of “China Region companies” may include certain risks and considerations not typically associated with investing in U.S. securities. In general, China Region companies are those that are organized under the laws of, or have a principal office in, the People’s Republic of China (“China”), Hong Kong, Taiwan and Macau; the principal securities market for which is China or Taiwan; that derives at least 50% of its total revenues or profits from goods or services that are produced or sold, investments made, or services performed in China or Taiwan; or at least 50% of the assets of which are located in China or Taiwan. Such risks include fluctuating currency values and changing local and regional economic, political and social conditions, which may result in greater market volatility. In addition, these securities may not be as liquid as U.S. securities. At June 30, 2011, the Fund had 36.6%, 32.6%, 28.8% and 1.2%, based on total net assets, of its total investments invested in China, Hong Kong, Taiwan and Macau, respectively.

ii) **Foreign Transactions** – Foreign security and currency transactions may involve certain considerations and risks not typically associated with those of U.S. dollar denominated transactions as a result of, among other factors, the level of governmental supervision and regulation of foreign securities markets and the possibility of political or economic instability.

iii) **Other** – In the normal course of business, the Fund may enter into contracts that provide general indemnifications. The maximum exposure under these arrangements is dependent on future claims that may be made against the Fund and, therefore, cannot be estimated; however, based on experience, the risk of any loss from such claims is considered remote.

7. Tax Status

U.S. Federal Income Taxes – No provision for federal income taxes is required since the Fund intends to continue to qualify as a regulated investment company under subchapter M of the Internal Revenue Code and distribute substantially all of its taxable income. The Fund is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits or losses will significantly change in the next twelve months. However, the Fund’s conclusions may be subject to future review based on changes in, or the interpretation of, the accounting standards or tax laws and regulations. The Fund’s Federal tax returns for the prior three fiscal years remain subject to examination by the Internal Revenue Service.

RESULTS OF THE ANNUAL STOCKHOLDERS' MEETING

The Fund held its annual stockholders' meeting on May 12, 2011. At this meeting, stockholders elected Julian M.I. Reid to the Fund's Board of Directors and approved an amendment to the Fund's investment policies, the results of which are set out below.

I) Election of Directors

Nominees	Votes For	Votes Against	Votes Withheld	Shares Not Voted	Total Voting Shares
Julian M.I. Reid	4,111,373	0	70,436	2,265,828	6,447,637

II) Amendments to the Fund's Investment Policies

	Votes For	Votes Against	Votes Withheld	Shares Not Voted	Total Voting Shares
Amendments to the Fund's Investment Policies	3,987,173	171,388	23,248	2,265,828	6,447,637

OTHER INFORMATION

Fundamental Investment Restriction on Borrowing

On May 12, 2011, shareholders of the Fund approved a change to the Fund's fundamental investment restrictions to permit, *inter alia*, the Fund to borrow up to 20% of its net assets for investment purposes.

This change is intended to give the Investment Advisor flexibility to take advantage of additional investment opportunities when it believes that the return from the additional investment would exceed the cost of borrowing. If the Fund borrows money, it may be exposed to additional risks. If the return on securities purchased with borrowed funds is less than the borrowing costs of those funds, then the use of borrowing will detract from Fund performance. In particular, borrowing will magnify losses in times of negative performance. Nonetheless, the Investment Advisor may maintain leverage if it expects that the long-term benefits to investors of maintaining leverage outweigh any current reduced return. Borrowing may also increase the Fund's interest and other expenses. Finally, the use of borrowing would subject the Fund to additional restrictions imposed by lenders and the Investment Company Act of 1940 on the Fund's investments.

The Investment Advisor will utilize borrowed monies at its discretion and under the close supervision of the Board. The Investment Advisor has agreed to waive its

entitlement to a management fee on any cash held when borrowings are drawn under a borrowing facility.

The entire text of the Fund's fundamental investment restriction on borrowing is as follows:

"Under its fundamental investment restrictions, the Fund may not: Issue senior securities, borrow or pledge its assets, except that the Fund may (i) borrow from a bank for the purpose of obtaining amounts necessary to make distributions for qualification as a registered investment company to avoid imposition of an excise tax under United States tax law; and (ii) borrow money (including through reverse repurchase agreements) up to the maximum amount permitted under the Investment Company Act of 1940 (a) for temporary or emergency purposes, (b) for such short-term credits as may be necessary for the clearance or settlement of transactions, (c) for repurchases of its Common Stock and (d) for investment purposes, provided that amounts borrowed under this clause shall not exceed 20% on the net assets of the Fund. The Fund may also pledge its assets to secure such borrowings. Notwithstanding the above, initial and variation margin in respect of futures contracts and options thereon and any collateral arrangement in respect of options on securities or indexes will not be prohibited by this paragraph 3 or any other investment restrictions."

RESULTS OF THE ANNUAL STOCKHOLDERS' MEETING (continued)

Information About Portfolio Holdings

The Fund files its complete schedule of portfolio holdings with the U.S. Securities and Exchange Commission (the "Commission") for the first and third quarters of each fiscal year on Form N-Q. The Fund's Forms N-Q are available on the Commission's website at <http://www.sec.gov> and may be reviewed and copied at the Commission's Public Reference Room in Washington, DC. Information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

Proxy Voting Policies and Procedures and Proxy Voting Record

A description of the policies and procedures that are used by the Fund's investment advisor to vote proxies relating to the Fund's portfolio securities is available (1) without charge, upon request, by calling +44 20 7742 3477; and (2) as an exhibit to the Fund's annual report on Form

N-CSR which is available on the website of the Securities and Exchange Commission (the "Commission") at <http://www.sec.gov>. Information regarding how the investment adviser votes these proxies is now available by calling the same number and on the Commission's website. The Fund has filed its report on Form N-PX covering the Fund's proxy voting record for the 12 month period ending June 30, 2011.

Certifications

Simon J. Crinage, as the Fund's President, has certified to the New York Stock Exchange that, as of June 9, 2011, he was not aware of any violation by the Fund of applicable NYSE corporate governance listing standards. The Fund's reports to the Commission on Forms N-CSR and N-CSRS contain certifications by the Fund's principal executive officer and principal financial officer that relate to the Fund's disclosure in such reports and that are required by Rule 30a-2(a) under the 1940 Act.

** The officers of the Fund serve at the discretion of the Board.

DIVIDEND REINVESTMENT AND CASH PURCHASE PLAN (Unaudited)

The Fund operates an optional Dividend Reinvestment and Cash Purchase Plan (the 'Plan') whereby:

- a) shareholders may elect to receive dividend and capital gain distributions in the form of additional shares of the Fund (the Share Distribution Plan).
- b) shareholders may make optional payments (any amount between \$100 and \$3,000) which will be used to purchase additional shares in the open market (the Share Purchase Plan).

For a copy of the Plan brochure, as well as a dividend reinvestment authorization card, please contact the Plan Agent:

Computershare Trust Company, N.A.
P. O. Box 43010
Providence, RI 02940-3010
USA Telephone No.: 800-426-5523 (toll-free)
www.computershare.com

The following should be noted with respect to the Plan:

If you participate in the Share Distribution Plan, whenever the Board of Directors of the Fund declares an income dividend or net capital gain distribution, you will automatically receive your distribution in newly issued shares (cash will be paid in lieu of fractional shares) if the market price of the shares on the date of the distribution is at or above the net asset value of the shares. The number of shares to be issued to you by the Fund will be determined by dividing the amount of the cash distribution to which you are entitled (net of any applicable withholding taxes) by the greater of the net asset value ('NAV') per share on such date or 95% of the market price of a share on such date. If the market price of the shares on such a distribution date is below the NAV, the Plan Agent will, as agent for the participants, buy shares on the open market, on the New York Stock Exchange or elsewhere, for

the participant's account on, or after, the payment date. There is no service charge for purchases under this Plan.

For U.S. federal income tax purposes, shareholders receiving newly issued shares pursuant to the Share Distribution Plan will be treated as receiving income or capital gains in an amount equal to the fair market value (determined as of the distribution date) of the shares received and will have a cost basis equal to such fair market value. Shareholders receiving a distribution in the form of shares purchased in the open market pursuant to the Plan will be treated as receiving a distribution of the cash distribution that such shareholder would have received had the shareholder not elected to have such distribution reinvested and will have a cost basis in such shares equal to the amount of the distribution.

There will be no brokerage charge to participants for shares issued directly by the Fund under the Plan. Each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent's open market purchases of shares in connection with the Plan. The Fund will pay the fees of the Plan Agent for handling the Plan.

You may terminate your account under the Share Distribution Plan by notifying the Plan Agent in writing. The Plan may be terminated by the Plan Agent or the Fund with notice to you at least 30 days prior to any record date for the payment of any distribution by the Fund. Upon any termination, the Plan Agent will deliver a certificate or certificates for the full shares held for you under the Plan and a cash adjustment for any fractional shares.

You also have the option of instructing the Plan Agent to make semi-annual cash purchases of shares in the open market. There is a service charge of \$1.25 for each purchase under this Share Purchase Plan.
